Presentación

La Organización para Estudios Tropicales (OET) cree firmemente que el correcto manejo de los datos y la información, es un herramienta indispensable para promover la educación y la investigación en los trópicos y esa es una razón para que desde 1996 utilizando la plataforma de su Biblioteca, haya desarrollado y consolidado la “Bibliografía Nacional en Biología Tropical” (BINABITROP).

En la actualidad BINABITROP cuenta con 37000 registros de libros, publicaciones periódicas, tesis, monografías, congresos y otros, de los cuales más de 13 mil de estos documentos se ofrecen ya en texto completo. Este es un proyecto único en el país, cuyo objetivo principal es rescatar las publicaciones científicas que tratan sobre Costa Rica, generadas a través de los años tanto dentro como fuera del país para reunir las en una base de datos disponible al público.

De esta forma la OET colabora con aumentar, conservar y difundir conocimientos generados a partir de nuestra riqueza natural y se constituye en una herramienta de consulta obligatoria para investigadores. La temática principal es Biología Tropical y temas afines como: ecología, manejo de recursos naturales, conservación de la biodiversidad, aspectos legales, sociales y económicos, forestales, agroecología.

Para visitar BINABITROP lo puede hacer en la dirección <http://www.ots.ac.cr/binabitrop> o si requiere más información puede escribirnos a biblioteca.oet@ots.ac.cr

Como un subproducto de BINABITROP, hemos iniciado desde el 2001 la generación de Bibliografías Especializadas que tienen como objetivo, compilar las referencias sobre un tema específico y crear un documento electrónico de libre acceso, que le facilite a los interesados sobre el tema tener en un solo punto la información que requieran y así aumentar y difundir el conocimiento que tenemos de nuestra riqueza natural de una forma más práctica.

Vulcanismo, Sismología, Geoquímica, Tectónica de Placas y Subducción en Costa Rica, es nuestra producción 10 de las Bibliografías Especializadas OET, la cual esperamos que sea de interés para la comunidad científica, educativa y general.

Hacemos público nuestro agradecimiento al señor Gilbert Fuentes, Consultor de OET para BINABITROP su acción desinteresada en realizar esta compilación libre de costo.
