

**ORGANIZATION FOR TROPICAL STUDIES
LIBRARY
HUERTOS PROJECT
(Alphabetical order, Up date February 27, 2007)**

1. Bigelow, S. W. 2001. Evapotranspiration modelled from stands of three broad-leaved tropical trees in Costa Rica . *Hydrological Processes* 15, no. 14: 2779-2796.
2. ———. 1993. Leaf nutrients in relation to stature and life form in tropical rain forest. *Journal of Vegetation Science* 4, no. 3: 401-408.
3. ———. 1998. Stand rotation frequency as a determinant of leaching in the humid tropics. Ph.D. Dissertation. University of Florida.
4. Bigelow, S. W., J. J. Ewel, and J. P. Hagggar. 2004. Enhancing nutrient retention in tropical tree plantations: no short cuts. *Ecological Applications* 14, no. 1: 28-46.
5. Carney, K. M. 2003. The influence of plant diversity and land use on the composition and function of soil communities. Ph.D. Dissertation. Stanford University.
6. Carney, K. M., and P. A. Matson. 2006. The influence of tropical plant diversity and composition on soil microbial communities. *Microbial Ecology* 52: 226-238.
7. ———. 2005. Plant communities, soil microorganisms, and carbon cycling: does altering the world belowground matter to ecosystem functioning? *Ecosystems* 8: 928-940.
8. Carney, K. M., P. A. Matson, and B. J. M. Bohannan. 2004. Diversity and composition of tropical soil nitrifiers across a plant diversity gradient and among land use types. *Ecology Letters* 7, no. 8: 684-694.
9. Casey, M. 1996. Throughfall in a forestry plantation at the La Selva Biological Station, Costa Rica. M.Sc. Thesis. University of Tennessee.
10. Clark, M. L., D. B. Clark, and D. A. Roberts. 2004. Small-footprint lidar estimation of sub-canopy elevation and tree height in a tropical rain forest landscape. *Remote Sensing of Environment* 91: 68-89.
11. Cole, T. G., and J. J. Ewel. 2006. Allometric equations for four valuable tropical tree species. *Forest Ecology and Management* 229: 351-360.

12. Ewel, J. J. 1997. Ecosystems processes and the new conservation theory. In *Ecology and the new conservation theory. Proceedings of the VI Cary Conference*, S. T. A. Pickett, R. S. Ostefeld, M. Shachak, and G. E. Likens, eds . New York: Chapman and Hall. Pp. 252-261
13. Ewel, J. J. 1999. Natural systems as models for the design of sustainable systems of land use. *Agroforestry Systems* 45, no. 1/3: 1-21.
14. Ewel, J. J. 1993. The power of biology in the sustainable land use equation. *Biotropica* 25, no. 3: 250-251.
15. ———. 2006. Species and rotation frequency influence soil nitrogen in simplified tropical plant communities. *Ecological Applications* 16, no. 2: 490-502.
16. Ewel, J. J., and A. J. Hiremath. 2005. Plant-plant interactions. In: *Biotic Interactions in the Tropics*. M. Pinnard D. Bursalem, and S. Hartley, eds Cambridge UK. Cambridge University Press. Pp. 203-234.
17. Ewel, J. J., and S. W. Bigelow. 1996. Plant life-forms and tropical ecosystem functioning. In: *Biodiversity and ecosystem processes in tropical forests*. G. Orians, R. Dirzo, and J. H. Cushman, eds. Berlin: Springer-Verlag. Pp. 101-126.
18. Ewel, J. J., M. Cifuentes, and A. Hiremath. 1997. El mito de la luz como limitante del crecimiento: efecto de la competencia por nutrimentos sobre los árboles. In: *III Congreso Forestal Nacional*, San José: Impresos Belén. Pp. 305-307.
19. Ewel, J. J., and A. J. Hiremath. 1998. Nutrient use efficiency and the management of degraded lands. In: *Ecology today: an anthology of contemporary ecological research*. eds B. Gopal, S. Pathak, and K. G. Saxena, eds. New Delhi: International Scientific Publications. Pp. 199-215.
20. Gerwing, J. J. 1993. Competitive effects of monocultures and a polyculture of three tropical tree species on understory plant growth. M.Sc. Thesis. University of Florida.
21. Gerwing, J. J. 1995. Competitive effects of three tropical tree species on two species of Piper. *Biotropica* 27, no. 1: 47-56.
22. Haggard, J. P., and J. J. Ewel. 1995. Establishment, resource acquisition, and early productivity as determined by biomass allocation patterns of three tropical tree species. *Forest Science* 41, no. 4: 689-708.
23. ———. 1994. Experiments on the ecological basis of sustainability: early findings on nitrogen, phosphorus and root systems. *Interciencia* 19, no. 6: 347-351.

24. ———. 1997. Primary productivity and resource partitioning in model tropical ecosystems. *Ecology* 78, no. 4: 1211-1221.
25. Heneghan, L., D. C. Coleman, D. A. Crossley, and X. Zou. 1999. Nitrogen dynamics in decomposing chestnut oak (Quercus prinus L.) in mesic temperate and tropical forest. *Applied Soil Ecology*, no. 13: 169-175.
26. Heneghan, L., D. C. Coleman, X. Zou, D. A. Crossley, and B. L. Haines. 1998. Soil microarthropod community structure and litter decomposition dynamics: a study of tropical and temperate sites. *Applied Soil Ecology*, no. 9: 33-38.
27. ———. 1999. Soil microarthropod contributions to decomposition dynamics: tropical-temperate comparisons of a single substrate. *Ecology* 80, no. 6: 1873-1882.
28. Hiremath, A. J. 1999. Nutrient use efficiency in simplified tropical ecosystems. Ph.D. Dissertation. University of Florida.
29. ———. 2000. Photosynthetic nutrient-use efficiency in three fast-growing tropical trees with differing leaf longevities. *Tree Physiology* 20, no. 14: 937-944.
30. Hiremath, A. J., and J. J. Ewel. 2001. Ecosystem nutrient use efficiency, productivity, and nutrient accrual in model tropical communities. *Ecosystems* 4, no. 7: 669-682.
31. Hiremath, A. J., J. J. Ewel, and M. Cifuentes-Jara. 1997. Pérdida de nutrimentos por escorrentía de fuste en ecosistemas tropicales simplificados. In: *III Congreso Forestal Nacional*, San José: Impresos Belén. Pp. 31-33
32. Hiremath, A. J., J. J. Ewel, and T. G. Cole. 2002. Nutrient use efficiency in three fast-growing tropical trees. *Forest Science* 48, no. 4: 662-672.
33. Hooper, D. U. F. S. Chapin III J. J. Ewel A. Hector P. Inchausti S. Lavorel J. H. Lawton D. M. Lodge M. Loreau S. Naeem B. Schmid H. Setälä A. J. Symstad J. Vandermeer D. A. Wardle. 2005. Effects of biodiversity on ecosystem functioning: a consensus of current knowledge. *Ecological Monographs* 75: 3-35.
34. Hummel, S. 2000. Height, diameter and crown dimensions of Cordia alliodora associated with tree density. *Forest Ecology and Management* 127, no. 1-3: 31-40.
35. Hummel, S. 1997. Stand development of Cordia alliodora (Boraginaceae), a neotropical secondary forest tree in Northern Costa Rica (1992-1996). Ph.D. Dissertation. Oregon State University.
36. Hummel, S. S. 2000. Coppice sprouts in Cordia alliodora. *Journal of Tropical Forest Science* 12, no. 3: 552-560.

37. Hummel, S. S. 2000. Understory development in young Cordia alliodora plantations . *New Forests* 19, no. 2: 159-170.
38. Kelty, M. J. 2000. Species interactions, stand structure, and productivity in agroforestry plantation. In: *The silvicultural basis for agroforestry systems*. M. Ashton, and F. Montagnini, eds. Boca Raton, FL: CRC Press. Pp. 183-205
39. Kelty, M. J., and I. R. Cameron. 1995. Plot designs for the analysis of species interactions in mixed stands. *Commonwealth Forestry Review* 74: 322-332.
40. Lovelock, C. E., and J. J. Ewel. 2005. Links between tree species, symbiotic fungal diversity and ecosystem functioning in simplified tropical ecosystems. *New Phytologist* 167: 219-228.
41. Mata Arroyo, A. 2002. Diagnóstico de los insectos herbívoros en las plantaciones puras de pilón, cedro y laurel, en la Estación Biológica La Selva, Puerto Viejo, Sarapiquí, Costa Rica . *Memoria del Taller Seminario: Especies Forestales Nativas, Heredia CR, 4-5-Abril 2002* . Heredia: Universidad Nacional / Instituto de Investigación y Servicios Forestales (INISEFOR).
42. ———. 2001. Diagnóstico de los insectos herbívoros presentes en las plantaciones de monocultivos de pilón, cedro y laurel, ubicadas en las parcelas experimentales del Proyecto Huertos, Estación Biológica La Selva, Puerto Viejo de Sarapiquí, Heredia, Costa Rica. Tesis de Bachillerato. Instituto Tecnológico de Costa Rica.
43. Menalled, F.D. 1996. Crown structure, light availability, and stand dynamics in forest plantations in Costa Rica: a comparison of species mixtures and monocultures. Ph.D. Dissertation. University of Massachusetts.
44. Menalled, F. D., and M. J. Kelty. 2001. Crown structure and biomass allocation strategies of three juvenile tropical tree species . *Plant Ecology* 152, no. 1: 1-11.
45. Menalled, F. D, M. J Kelty, and J. J. Ewel. 1998. Canopy development in tropical tree plantations: a comparison of species mixtures and monocultures. *Forest Ecology and Management* 104, no. 1-3: 249-263.
46. Merwin, M. C., S. A. Rentmeester, and N. M. Nadkarni. 2003. The influence of host tree species on the distribution of epiphytic bromeliads in experimental monospecific plantations, La Selva, Costa Rica. *Biotropica* 35, no. 1: 37-47.
47. Möser, J. 2000. Interaktionen zwischen Herbivoren, Ameisen und Parasitoiden auf Cordia alliodora (Boraginaceae): Eine Untersuchung im Tieflandregenwald von La Selva in Costa Rica .Thesis, Diplomarbeit. Universität Hannover.

48. Reich, A., J. J. Ewel, N. M. Nadkarni, T. E. Dawson, and R. D. Evans. 2003. Nitrogen isotope ratios shift with plant size in tropical bromeliads . *Oecologia* 137: 587-590.
49. Reich, A., N. M. Holbrook, and J. J. Ewel. 2004. Developmental and physiological correlates of leaf size in Hyeronima alchorneoides (Euphorbiaceae). *American Journal of Botany* 91, no. 4: 582-589.
50. Rodgers, H. L., M. P. Brakke, and J. J. Ewel. 1995. Shoot damage effects on starch reserves of Cedrela odorata. *Biotropica* 27: 71-77.
51. Russell, A. E., C. A. Cambardella, J. J. Ewel, and T. B. Parkin. 2004. Species, rotation, and life-form diversity effects on soil carbon in experimental tropical ecosystems. *Ecological Applications* 14, no. 1: 47-60.
52. Silver, W. L. A. W. Thompson A. Reich J. J. Ewel & M. K. Firestone. 2005. Nitrogen cycling in tropical plantation forests: potential controls on nitrogen retention. *Ecological Applications* 15: 1604-1614.
53. Tillberg, C. V. 2003. The evolution and ecology of an ant-plant symbiosis . Ph.D. Dissertation. The University of Colorado.
54. ———. 2004. Friend or foe? A behavioral and stable isotopic investigation of an ant-plant symbiosis. *Oecologia* 140: 506-515.
55. Torregrosa G., A., P. M. Rich, and J. J. Ewel. 1990. Effects of forest edges on the solar radiation regime in a series of reconstructed tropical ecosystems. *American Society for Photogrammetry and Remote Sensing*: 98-108.
56. Trager, M. D. 2005. Patterns of ant occupation and anti-herbivore defense in Cordia alliodora, a neotropical myrmecophyte . M.S. Thesis. University of Florida.
57. Trager, M. D., and E. M. Bruna. 2006. Effects of plant age, experimental nutrient addition and ant occupancy on herbivory in a neotropical myrmecophyte. *Journal of Ecology* 94: 1156-1163.
