

BOOKS ON THE MARKET - LIBROS EN EL MERCADO

Introduction

Many journals, ours included, publish book reviews. Nevertheless, reviews cannot include a significant sample of the copious production offered by the market. Thus we have created this new section, which will appear in most issues of the *Revista de Biología Tropical*. It will list hundreds of books related having to do with the biology of the tropics, including not only recent titles, but others still available. Format: title, authors, publishers and basic price. If your local dealer is unable to provide a title, ask us for guidance.

The Editor

Introducción

Aunque muchas revistas, incluyendo la nuestra, tienen secciones de reseña bibliográfica, no es posible reflejar allí una fracción significativa del enorme volumen de libros que el mercado ofrece. Por ello hemos creado esta nueva sección, que aparecerá frecuentemente en la *Revista de Biología Tropical*. Informará a los lectores sobre centenares de libros de interés para quienes investigan la biología de los trópicos. Se incluyen no solo los títulos más recientes, sino también otros que aún están disponibles. El formato es: título, autores, editorial y precio base. Invitamos especialmente a los autores latinoamericanos a que nos envíen sus libros para reseñar en nuestras páginas, o bien esta información básica para incluirlos en "Libros en el Mercado".

Si su distribuidor local no puede proveerle los libros, consúltenos y con mucho gusto le ayudaremos.
